"Chillin' Pools*, Data Czars"**

Lyrics by Andee Sea Cae Jak, this is a very dark cover of Paul Henning's "The Ballad of Jed Clampett" (original at https://www.youtube.com/watch?v=NwzaxUF0k18) and has eight verses due to degree of relevant content.

Verse 1
I'm going to share a story
['fore I wind up dead]:
Elon's building tunnels
so his A.I.[1] won't boil red.
To crank the 1s & 0s[2],
he needs systems to stay cool
and air's not good enough:
he needs water from a pool[3].
Source, that is. A really big one.

Verse 2
Nashville has an aquifer[4];
plus, Cumberland[5] is there,
If the rain proves not enough,
then DARPA[6] could prepare.
Dry ice? Not a problem:
just buy Nippon Sanso's keys[7]
And Tremfya[8], if we took enough,
might help to form a breeze.
Wind, that is. Blowin' kind[9].

Verse 3
Tripped over "Lucid Gravity"[10]
and wondered what it meant.
Well, given the three anagrams[11],
I think they'll need a vent[12].
Bet Elon's called his "friends" [13] at Cambridge,
Harvard, MIT
and asked them to come up with something
really speedy.
Fast, that is. Über quick[14, 15]

Verse 4
Why Paramount[16] wants Nashville
isn't much of a surprise.
With SpaceForce[17] now in Huntsville[18],
control can be centralized.
The work in Chattanooga[19]
can roll out across the state:
we people still have free will[20]
but process our choice as fate[21].

Verse 5
Wish your jokes were funnier?
Were better on your feet?
I.Q.[22] doesn't manifest[23]
for people whom[24] you meet?
Want more knowledge[25]/wisdom[26];
but, don't believe in Grace[27]?
Then call up Elon if you like,
he'll glue[28] on "Neural Lace"[29].
[Wires], that is. Sticky ones.[30]

Verse 6
Don't like the skin your livin' in,
check Vogue[31] and buy a "wrap"[32]
Swapping out the old one though
might need a spinal tap[33].
If Graham Hudson's "mannequins"
and Burberry[34] are fine,
worry not—"Why fuss sis"[35]?
you'll be trumping Calvin Klein[36].

Verse 7
insert line 1
-
insert line 2
-
Now with the "best" of everything,
to keep it just behave[37]:
With CAD[38]-AI[39] as master,
you'll be happy as its slave[40].

Verse 8
Of course this speculation's based
on things I've seen and done[41]
A better explanation?
Like to hear it (if there's one).
If this seems too outlandish,
then remember when we are[41]:
wouldn't Satan's soul count increase
if he were a … **Data Czar**!

* If their Data Centers transpose into vertical operations (see Image 00x), the "Pools" could be replaced with "Spools".

** This tune is dedicated to Daniel Miller who graciously shifted the Overton Window (insert link); and, Brookfield properties which labelled its investment in [Nashville]-based swimming pool company as an industrial play (vs. a consumer discretionary play, see Image 00x) and see more on MSCI sub-sectors at draft outline stored at https://twb.rocks/living/exposure/msci.

[33] S [34] S [35] [36]insert reference to Elon's recent "Back to the Future" reference in his goofy 10.01 Tesla announcement or [camo suit] himself. [37] I.Q. tests measure the ease with which one can be [controlled]: see (insert link) [38] Thanks to The Holy Spirit for linking "Pi 'n k" to GSI-mal crew's "Dusty Rose" ID. It made the "3.14 N K" mockery more obvious and with "K" having a gematria value of 11 (ie. xi in Roman numerals which is Elon's AI logo), "Computer-assisted Design" + "Artificial Intelligence" was revealed as TPTB's ultimate goal. Nashville's Frist Art Museum's external displays in 2025/26 (see Images 00x-00y) [sealed the deal]. [39] A.I. won't *need* "sentience", the red-herring argument steering public discourse because you will have used your God-given free will to … "consent". [40]Including, but not limited to, ***merely a fully-conscious energy source*** (eg. electric, thermal, solar and … wind (see side effect of fast-tracked Pfizer drug, Tremfya ("Me Farty"). The leaked 4-minute introduction to WEF's interactive planning tool stored in https://twb.rocks/living/exposure/wef may have also been a red herring while TPTB's true intentions remained *almost* fully veiled.
