The complaint

Description of your complaint :
(Please specify the name of the implicated persons, the facts and dates)

my complaint against Dr. Kengai ("Kengai") goes far beyond the fact that she neither speaks nor understands english well enough to be my psychiatrist — she is also clearly incompetent ... and likely corrupt.

First and foremost, Kengai's insistence on contacting my ex-husband ("Kiska") for "collateral information" regarding my mental health indicates that:
(a) she has little or no understanding of Cluster B Personality disorders (such as narcissism and psycopathy) or the cycle of abuse, and
(b) she lacks an understanding of the laws surrounding "Substitute Decision Making" in the Province of Ontario and the concept of "conflict of interest" (e.g. my divorce from Kiska is not finalized; it involves millions of dollars and he is seeking sole custody of our children!)

Description of your complaint (cont'd) :

The fact that she did not once utilize a technique known as "socratic questioning" suggests that she has little (if any) experience in identifying a state of psychosis.

Kengai did not have my permission to contact Kiska or anyone else; yet, today is April 8th (when I was supposed to be in Ottawa to defend myself against Kiska) and she has not asked me any substantial questions!

Other than a brief discussion about my marriage on March 22nd, Kengai did not ask me about my mental health: there were no discussions about emotional or psychological abuse at all. Instead, she chose to simply seek information from other sources and she did this through manipulation and deceit. On March 27th, following a brief discussion about my diet, she insisted on knowing the exact address of my $1,000,000 + home and my temporary rental home*. Then, Kengai ended the interview by stating that "[she] was bored" and announced:

~~**The results expected from your complaint:**~~

"I will write my report after I read or hear information from [Kiska] and/or your sister-in-law."

I cannot imagine what could possibly be in Kengai's "independent psychiatric report".

I can only wonder: **Who paid her to write it?**

*did she contact my recalcitrant landlord too?!?!
