Re: Letter of Concern for Deirdre Moore dob 1965/09/28

Dear Sir or Madam:

I would like to request that Deirdre Moore dob Sep. 28, 1965 be assessed in hospital as she is unable to care for herself as she has not slept in several days, is responding to delusional beliefs that her husband and government are going to "get her". Her behaviours are escalating as she has attempted to flee this morning with her children and is making statements that she and her children may be better off dead.

Ms Moore was brought to Cornerstone today after fleeing with her two children in the family car. She presented in a regressed position, bend at the waist, her head in her lap, eyes closed, refusing to open them because it "was too scary". Ms Moore was observed to be attempting to climb out the window at the shelter when she heard police officers in the hallway. She endorsed delusional beliefs and fears of being killed by police, her spouse and IRA. Her thought process is tangential, often losing her train of thought, reports feeling "confused" and is writing detailed notes in order to remember. She reports her mood as "confused, afraid, sad and laughing".

She was recently admitted to psychiatry at the Ottawa Hospital, Civic Campus and discharged on March 5, 2013 but has been non compliant with medication.

Please do not hesitate to contact me if you require any further information, I can be reached on my cell phone at 613-978-4031.

Sincerely,

  
Ruth Mattok, MSW, RSW  
Social Worker, Psychiatric Outreach Team  
The Royal Ottawa Health Care Group
