Dear ECMC Internal Pharmacy,

re: Comprehending Drug Interactions

This morning I learned that the drug combination that ECMC intends to force upon me involuntarily on 20250402¹ is either:

a) Alternative #1²:

i/ 6 mg of RISPERDAL (PO) or

ii/ 30 mg of ZYPREXA (IM) and

iii/ 234 mg of INVEGA Sustenna (IM)

b) Alternative #2²

i/ 30 mg of HALDOL (PO) or

ii/ 200 mg of HALDOL Decanoate/month

c) Alternative #3²

i/ 30 mg of ZYPREXA (IM) and

ii/ 234 mg of INVEGA Sustenna (IM) and

iii/ 200 mg of HALDOL Decanoate (IM)/month

OR

SP

SEX: F

M001509867

Moore, Delidre

DOB: 09/28/1965

V00007984803
ECRPEP

Kindly provide details on the potential states of disease (also known as "possible adverse reactions"; also known as "side effects experienced"³) for each of ECMC's drug combinations proposed⁴. Also, please identify how my body composition (i.e. height, weight, % body fat) and age and sex (i.e. female) will increase or decrease same.

¹ See ECMC's 20250327 Notice of Petition ~~enacted~~

² Based on demonstrated criminality of ECMC thus far, maximum dosages assumed

³ Reported pre-marketing and post-marketing

⁴ See ECMC's 20250324 1420 NOTES dictated by Brenna Fox → header NYSCEF DOC. NO. 5, [rec'd]... 03/27/2025
