

“Chillin’ Pools*, Data Czars”**

Lyrics by Andee Sea Cae Jak, this is a very dark cover of Paul Henning’s “The Ballad of Jed Clampett” (original at <https://www.youtube.com/watch?v=NwzaxUF0k18>) and has eight verses due to degree of relevant content.

Verse 1

I’m going to share a story
 [fore I wind up dead]:
 Elon’s building tunnels
 so his A.I.¹ won’t boil red.
 To crank the 1s & 0s²,
 he needs systems to stay cool
 and air’s not good enough:
 he needs water from a pool³.
 Source, that is. A really big one.

Verse 2

Nashville has an aquifer⁴;
 plus, Cumberland⁵ is there,
 If the rain proves not enough,
 then DARPA⁶ could prepare.
 Dry ice? Not a problem:
 just buy Nippon Sanso’s keys⁷
 And Tremfya⁸, if we took enough,
 might help to form a breeze.
 Wind, that is. Blowin’ kind⁹.

Verse 3

Tripped over “Lucid Gravity”¹⁰
 and wondered what it meant.
 Well, given the three anagrams¹¹,
 I think they’ll need a vent¹².
 Bet Elon’s called his “friends”¹³ at Cambridge,
 Harvard, MIT
 and asked them to come up with something
 really speedy.
 Fast, that is. Über quick^{14, 15}

Verse 4

Why Paramount¹⁶ wants Nashville
 isn’t much of a surprise.
 With SpaceForce¹⁷ now in Huntsville¹⁸,
 control can be centralized.
 The work in Chattanooga¹⁹
 can roll out across the state:
 we people still have free will²⁰
 but process our choice as fate²¹.

Verse 5

Wish your jokes were funnier?
 Were better on your feet?
 I.Q.²² doesn’t manifest²³
 for people whom²⁴ you meet?
 Want more knowledge²⁵/wisdom²⁶;
 but, don’t believe in Grace²⁷?
 Then call up Elon if you like,
 he’ll glue²⁸ on “Neural Lace”²⁹.
 [Wires], that is. Sticky ones.³⁰

Verse 6

Don’t like the skin your livin’ in,
 check Vogue³¹ and buy a “wrap”³²
 Swapping out the old one though
 might need a spinal tap³³.
 If Graham Hudson’s “mannequins”
 and Burberry³⁴ are fine,
 worry not—”Why fuss sis”³⁵?
 you’ll be trumping Calvin Klein³⁶.

Verse 7

insert line 1
 -
 insert line 2
 -
 Now with the “best” of everything,
 to keep it just behave³⁷:
 With CAD³⁸-AI³⁹ as master,
 you’ll be happy as its slave⁴⁰.

Verse 8

Of course this speculation’s based
 on things I’ve seen and done⁴¹
 A better explanation?
 Like to hear it (if there’s one).
 If this seems too outlandish,
 then remember when we are⁴¹:
 wouldn’t Satan’s soul count increase
 if he were a ... **Data Czar!**

* If their Data Centers transpose into vertical operations (see [Image 00x](#)), the “Pools” could be replaced with “Spools”.

** This tune is dedicated to Daniel Miller who graciously shifted the Overton Window ([insert link](#)); and, Brookfield properties which labelled its investment in [Nashville]-based swimming pool company as an industrial play (vs. a consumer discretionary play, see [Image 00x](#)) and see more on MSCI sub-sectors at draft outline stored at <https://twb.rocks/living/exposure/msci>.
